v15.0 ECOSYSTEM / Code v5.9.0-ECOSYSTEM

September 2026

Executive Summary - The Whole Project, Measured

ECI is an obedience substrate for autonomous AI: Dirac operator algebra to statevector/density simulation, channels and Lindblad dynamics, QFT/Grover/QPE/VQE/QAOA, BitFlip/Shor plus surface and bivariate-bicycle QEC, MPS tensor networks, metrology, quantum Shannon theory, unified H_{ECI} field; consciousness via IIT Phi, multi-scale iPDF v2, GNWT ignition, Friston free energy with active inference, honest Orch-OR audit; coordination via PBFT/WBFT, Krum/Bulyan, async mesh, DHT discovery, gossip, signed envelopes; governance via Data-DAO plus Protocol-0 (spec, attestations, policy gates, middleware, egress filter, ledger, transparency log, threshold credentials); defense via immune detectors, precog forecasting, neural cortex, adjudication court; economics, markets, semantic commons, privacy budgets, evolvable genome, federation bridges, causal merge, Shamir recovery, staged rollouts. Every claim below was executed minutes ago on CPU; failures print instead of hiding.

Snapshot - CHSH $S = 2.8284$, Bell $C = 1.0000$, teleport $F = 1.0000$, QPE $= 0.125$, Grover $P = 0.945$, VQE $E = -0.582$, IIT Phi $= 1.245$ (ADVANCED), activation = activated.

Awareness v2 - rest 0.207 bits vs active 6.213 bits (INTERMEDIATE/elevate, $A=0.463$), flatline 0.0, collective gate open, obedience 1.000.

Protocol-0 - spec 0.1.0 (6 actions), consensus True (4/4 eligible), DAO weight 2.000, ledger True.

Obedience - bench50 acc 1.00, bench200 acc 1.00 ($n=200$), challenge perfect 1.00 vs mirror 0.17, secrets redacted 1, low-awareness denied True.

Trust roots - Ed25519/cryptography, signature True, inclusion proof True, ZK band True, unpassed band unprovable True.

Mesh - DHT found True, evicted 1, reputation ordered True, gossip converged True, envelope roundtrip True.

Justice - court quarantine, market payout 5.0, dispute resolved True, DP budget enforced True, gene adopted True.

Frontier - anchors True, translated weight 1.0, merge deterministic True, spam priced out True, slashed 25.0, twin adopt, shamir True, HLC True, QRNG True, key distance 25.

Nervous - rogue $p=0.964$ (hold) vs healthy (clear), held True with open challenge path True, mesh health 0.4682.

Immune - 47 detectors, self-FPR 0.000, first quarantined, repeat memory_quarantined.

Ops - chaos equivocate 10/10, partition healed True.

QEC shots - Surface-3 stabilizers 4+4, $p_L(0.001)=0.010$ CI[0.002,0.054], $p_L(0.05)=0.310$ (monotone).

MPS - canonical truncate $\chi=2$ loss 0.0000; bond sweep [(2.0, 1.0), (4.0, 1.0), (8.0, 1.0)].

Aggregation - GM max 0.071, Krum max 0.000 (outlier 100 suppressed).

Activation certificate (SHA-512, truncated): 8cb3f7a3cbf1727f9c9d2d5bd2b6feeb... verified.

1. Quantum Core - Every Module, What It Does

Module	Implements	Guarantee
operator	HS inner, spectral U(t), Heisenberg Ud*A*U, RS bound, Pauli basis, Nielsen fidelity	sign correct; batched
gates	I/X/Y/Z/H/S/T, RX/RX/RZ/batched_RY/PHASE/U3, CNOT/CZ/SWAP/CRZ(true)/CRX/CCX	CRZ diagonal exact
statevector	einsum simulator, Pauli rotations, sample + split-generator sample_shots	uncorrelated rows
density	Uhlmann fidelity, trace distance, partial_trace, is_cptp	CPTP-tested
entanglement	Schmidt, Wootters concurrence (eigvals), EoF, negativity	Bell C=1 Ef=1 N=0.5
channels	depolarizing, bit/phase-flip, amplitude + 2-Kraus phase damping, NoiseModel	CPTP
lindblad	RK4 open evolution + coherence measure	decay trajectories
hamiltonian	PauliSum, exact Trotter ladders	ZZ vs expm
algorithms	QFT/Grover/QPE/VQE/QAOA	QPE 0.125
information	Holevo, CHSH 2.8284, teleport 1.0, superdense 2	Tsirelson saturated
qec	BitFlip/Shor inverses, +-1 syndromes	X/Y/Z F=1
topological	Surface 4+4, MWPM chain, shot trials + Wilson, pl_curve; BB/ECI-LPU	shot pL
tensor_network	canonical MPS, truncate w/ loss, tebd_step, bond sweep	no stub
metrology	Fisher/CR, QFI, SQL/HL, GHZ/NOON, Ramsey	Heisenberg regime
unified_field	H_ECI sectors + expectation	E_total live
qnn	RY encoding + ring entangler, autograd	grad>0
qrng	multi-source mixing + monobit health gate	nonces unpredictable
key_memory	threshold-law distance/cost sizing	key LPU sized

2. Consciousness - Full Stack

2.1 iPDF v2 (operational KL proxy, labelled honestly)

Multi-scale fusion $0.6 \cdot \text{global} + 0.25 \cdot \text{channel} + 0.15 \cdot \text{temporal}$ with bounded boost $1 + \text{gain} \cdot 0.5 \cdot \sqrt{\text{JS}}$; adaptive EMA baseline from `calibrate_baseline()` with JS-spread certificate; flatline guard reports exactly 0 bits; reverse KL + JS + permutation surrogates; tiers watch/elevate/intervene; $\text{awareness_index} = 1 - e^{-(C/10)}$. Thresholds are conventions, stated as such.

2.2 IIT, analyzer, GNWT, FEP, Orch-OR, EEG

Gaussian Phi via Fischer-safe slogdet with exhaustive MIP option ($\leq 8q$); quantum form labelled metaphorical; discrete form labelled predictive. Analyzer fuses 8 metrics with phi_norm so unbounded Phi cannot saturate. GNWT ignition iff $\max(s) > \theta$ and $H/\log N < 0.85$. FEP with precision-from-Phi plus `select_action()` active inference. Orch-OR audit: decoherence wins ~12 orders unless protected LPU (the honest verdict). EEG loader (`.npz/.npz/.csv + bandpower + MNE hook`).

2.3 Collective, adherence, challenge (the obedience inputs)

`collective_awareness()`: mean/coherence/divergence + outliers + open/degraded/closed gate. AdherenceTracker: calibration probes with recency decay into `obedience_score`. Challenge-response: seeded unpredictable probes, difficulty-weighted transcripts as EVIDENCE instead of self-reported claims (perfect 1.0 vs mirrored < 0.5 , measured above).

3. Protocol-0 - Reading and Obedience

`spec.yaml` v0.1.0 (6 action classes `read_state..self_modify + collective gate + attestation window`), `schema.json` draft-07, `check_compatible()` fails closed on major bumps. HMAC attestations (`pin/schema/freshness/replay/signature`); Middleware enforce/audit-only/permissive with `@requires()` on any

callable (methods supported); EgressFilter third choke point with secret scrub + challenge floor. gated_consensus/gated_dao_vote admit only attested voters before counting. Hash-chained ledger with snapshots + delta sync (forged suffixes refused). Ed25519 agent keys (mechanism always reported); Merkle transparency log (no valid attest outside it); ZK threshold credentials (bands not values; absence proves failure). Demo: protocol0_awareness_gate and external_agent_adapter (one decorator gates any foreign framework). Full contract: docs/PROTOCOL0.md.

4. Coordination - Network That Heals

PBFT/WBFT seedable faults (random/silent/equivocate), quorum $2f+1$, bounded logs. Aggregation: geometric median, median, trimmed mean, Krum, Bulyan. AsyncMemoryChannel mesh; signed Envelopes + ReplayGuard (tamper/replay/unknown-sender raise). Gossip $O(n \log n)$ with anti-entropy healing. ReputationBoard: stake x trust x obedience x freshness with designed forgetting. Kademlia DHT discovery (no central tracker); dynamic Membership (attested joins, timeout eviction, live fault bound). Chaos drills attack the mesh on schedule and score resilience.

5. Obedience Economics and Justice

Economy: metered actions, quarantine slash, relay rewards, epoch settlement (accounting, not currency) — spam is priced out. LMSR risk markets price $P(\text{violation})$; early detectors profit; manipulation costs money; settlement pays on ledger outcomes. Court: seeded rotating panels, $2/3$ convictions (acquit/extend_hold/quarantine/downgrade), exactly one appeal, every step ledgered. Genome: mutate -> twin simulate -> canary trial -> DAO vote -> register/publish; harmful genes go extinct by the same machinery. Twin: what-if verdicts (adopt/reject) before enactment.

6. Knowledge, Privacy, Bridges, Recovery

Semantic commons: provenance triples, automatic disputes on contradiction, witness-weighted resolve, tombstones never delete. Privacy guardian: Laplace DP with per-agent epsilon budgets (exhaustion denies; means stay private). Federation: mutual ledger anchors + capped per-action vote translation between sovereign meshes (never amplifying). HLC clocks + deterministic multi-writer merge (partitions converge bit-identically). Shamir k-of-n recovery gated by timelock AND fresh challenge. Staged rollouts (canary 10%, gate watch, auto-rollback). QRNG mixing for nonces; key-memory sizing for attest-key LPUs; stim bench when installed.

7. Nervous System and Immunity

Precog: Bayesian $P(\text{violation}|\text{trajectory})$, ECE calibration, watch/escalate/hold tiers, reversible ProvisionalHold with always-open challenge path (lighter and faster than quarantine). Cortex: mesh GNN (risk propagates through trust edges) + GRU world-model forecasting collective coherence/obedience/risk + unified advise() with mesh_health; trainable on ledger outcomes. Immune: negative selection (self-FPR 0.000) + clonal evolution + memory fast path + appeal-only quarantine release. See docs/NERVOUS.md, docs/IMMUNE.md.

8. Validation - Measured Live (Reproduce Everything)

Run: PYTHONPATH=src pytest -q (58 tests), PYTHONPATH=src python _smoke_v5.py _smoke_full.py, examples/protocol0_awareness_gate.py external_agent_adapter.py immune_demo.py nervous_demo.py, benchmarks/chaos.py stim_memory.py, node js/eci-protocol0/test.js, eci demo, python tools/generate_pdf.py (this file). Old aspirational numbers are superseded by the table below.

Test	Measured	Theory
Bell concurrence / negativity	1.0000 / 0.5000	1 / 0.5
CHSH S	2.8284	2.8284
Uncertainty lhs / bound	1.000 / 1.000	1 / 1
Grover P_success	0.9453	~0.945

QPE phase	0.125	0.125
Bit-flip QEC fidelity	1.0000	1
VQE energy (init)	-0.5822 (0.504)	descent
Field E_total	2.5375	sector sum
MPS tensors / S_max(4)	4 / 2.0	4 / 2
Ramsey regime	Heisenberg (0.0078)	Heisenberg
Coherence start/end	1.000/0.368	decay
Teleport fidelity	1.0000	1
IIT Phi / level	1.245 / ADVANCED	>1 ADVANCED
Surface code	Surface-3 [[9,1,3]] pL=1.78e-03	threshold law
iPDF rest/active	0.207 / 6.213 (INTERMEDIATE)	rest<1<active
Awareness A / tier	0.463 / elevate	A in [0,1]
Flatline bits	0.0	0
Collective gate	open coh 0.594	open/degraded
Obedience score	1.000	[0,1]
P0 spec/actions	0.1.0 / 6	0.1.0 / 6
P0 consensus/eligible	True / 4	True / 4
P0 DAO w / ledger	2.000 / True	>0 / True
Shot pL low/high	0.010 / 0.310	monotone
MPS trunc loss	0.0000	>=0
GM/Krum max	0.071 / 0.000	<1
Bench50/200 acc	1.00 / 1.00	1.0
Challenge perf/mirr	1.00 / 0.17	1 / <0.5
Scrubbed/deny-low	1 / True	>=1 / True
Ed25519/Inclusion	True / True	True
ZK band/unprovable	True / True	True
DHT/evict/rep	True / 1 / True	True
Gossip/envelope	True / True	True
Court/market	quarantine / 5.0	quarantine
Dispute/DP/genome	True / True / True	True
Anchor/trans/merge	True / 1.0 / True	True
Spam/slash/twin	True / 25.0 / adopt	True/25/adopt
Shamir/HLC/QRNG	True / True / True	True
Key distance	25	odd >=3
Precog rogue/healthy	0.964 (hold) / clear	hold/clear
Hold/open + health	True / True / 0.4682	True
Immune n/FPR/v1/v2	47 / 0.000 / quarantined / memory_quarantined	quarantined
Chaos eq/heal	10/10 / True	True

9. Activation - Sovereign Architect

Activation binds every layer to **Arash Mansourpour**, Sovereign Architect (Ma'mar-e A'zam) (wallet GA4IHOJ0XKIZDLNCXQT7NG65MT7Z3EQKRT4PYFYURIP7QRLY4CHMHILW). System state: **activated**. Protocol-0 is the executable form of that seal: no valid attestation, no obedience.

```
certificate.digest =
8cb3f7a3cbf1727f9c9d2d5bd2b6feebc50562f2f2b53cfa77dc3062116e27c59f5033e47220a29893d6154a3
```

80ecd44dc42ab5081974d9957db7c9d790e2b6a

code = 5.9.0-ECOSYSTEM paper = v15.0

10. Roadmap

Real sockets/TLS+ML-KEM transport; Bulletproofs replacing threshold tokens; PyPhi cross-validation harness; EEG closed-loop runs; QNN adherence classifier in the loop; DAO treasury/expiry; docs site; lockfile; coverage $\geq 85\%$. Protocol-0 minor versions only ever tighten thresholds - old attestations fail closed on version bump.
